Profile

Motivated and detail-oriented Telecommunications Engineering graduate with a specialization in cybersecurity. Known for a strong analytical mindset, a solid grasp of modern security principles, and hands-on experience in cloud and network security. Eager to contribute to securing digital environments through a continuous learning approach and a collaborative spirit.

Professional Experience

02/2025 – 06/2025	Cloud Security Intern, Consultim-IT  - Designed and implemented a complete Zero Trust architecture aligned with Microsoft's security framework for a hybrid enterprise environment. - Developed a custom Zero Trust gap assessment platform using Python and Streamlit, featuring both manual and automated evaluation modes powered by PowerShell and Microsoft Graph API integration. - Automated compliance tracking and reporting across Identity, Device, and Network pillars, enabling continuous alignment with Zero Trust maturity objectives.
07/2024 – 08/2024	Network & Infrastructure Security Intern, Spark-IT  - Deployed a centralized SIEM solution using Security Onion and Elastic Stack to monitor real-time network traffic and security events. - Integrated pfSense firewall and Suricata IDS for perimeter and internal threat detection, and automated log forwarding using Filebeat and Elastic Agent. - Engineered a custom network telemetry script in Python, leveraging the Prometheus–Telegraf–InfluxDB stack to visualize key performance and health metrics in Grafana dashboards.

Projects

02/2025 – 06/2025	Zero Trust Global Admin Automation Tool, PowerShell, Microsoft Graph API, Security Automation - Built a unified administration and monitoring platform leveraging PowerShell and Microsoft Graph API to collect, evaluate, and centralize organizational security data across users, devices, and identities. - Implemented real-time security drift detection with automated alerts via Microsoft Teams webhooks, enhancing visibility and incident responsiveness across a fragmented Microsoft security ecosystem. - Consolidated multiple portal-dependent tasks into a single Streamlit dashboard, offering a single pane of glass for user insights, device compliance, sign-in behavior analysis, and anomaly detection.
09/2024 – present	Proxmox-Based Homelab Deployment & Monitoring, Proxmox VE, Docker, Pi-hole, TrueNAS, Grafana, Nginx Proxy Manager  - Deployed and managed a virtualized homelab environment on Proxmox, running 10+ self-hosted services in Docker containers, including Pi-hole, TrueNAS, Portainer, and Nginx Proxy Manager. - Built a custom API-driven dashboard and integrated Grafana for real-time monitoring of node health, resource utilization, and container performance metrics.
11/2024 – 12/2024	Single Sign-On (SSO) for Self-Hosted Applications using Authentik, Authentik, Portainer, Nginx Proxy Manager, Docker - Implemented SSO for self-hosted apps using Authentik as the Identity Provider, integrated with Portainer (Service Provider) via OAuth2, enforced TOTP-based MFA, and validated secure access with role-based control. - Deployed all components in Docker with Nginx Proxy Manager as a reverse proxy, leveraging self-signed SSL certificates and a shared Docker bridge network to ensure secure and isolated communication between services.
08/2024 – 09/2024	SOAR Workflow for Threat Response Automation, Tines, LimaCharlie EDR  - Designed and implemented a SOAR pipeline using Tines to automate threat detection, alert enrichment, and incident response actions via integration with LimaCharlie EDR. - Developed a custom detection rule for LaZagne credential dumping, triggering Slack and email notifications and isolating compromised hosts remotely for rapid containment.
10/2023 – 04/2024	Segmented Virtual Network Lab for Cybersecurity Simulation, VirtualBox, pfSense, Snort IDS, Splunk, Kali Linux, DFIR Tools  - Designed and deployed a fully virtualized lab environment in VirtualBox simulating 10+ networked systems, including firewalls, IDS, SIEM, and vulnerable hosts for red/blue team training. - Implemented segmented network zones with pfSense and integrated Snort and Splunk to monitor traffic, generate alerts, and analyze attack patterns for defensive response exercises.

Education

09/2022 – 06/2025	Master of Engineering (M.Eng.) in Telecommunications Engineering, ENET'Com ↗
09/2019 – 06/2022	Bachelor's Degree in Information and Communication Technologies, ENET'Com ↗

Skills

Networking & Telecommunications
Network Protocols, Routing & Switching, Network Monitoring & Analysis, Wireless Technologies, Telecommunication Systems, Virtualization, Infrastructure Setup, Automation & Scripting, Cloud.

Security and Risk Assessment
Cybersecurity Fundamentals, Security Frameworks, Vulnerability Management, Security Auditing, Identity & Access Reviews, Zero Trust , Zero Trust Maturity Assessments, Cloud Security, Cryptography, IAM, Security Protocols, Security Audit, Authentication & Authorization.

Tools and Programming Languages
VMware, Hyper-V, pfSense, Nmap, Wireshark, OpenVAS, Nessus, Metasploit, Microsoft Entra (Azure AD), Intune, Defender for Endpoint, Defender for Cloud Apps, Secure Score, Microsoft Purview, Azure Security Center, Sentinel.

Languages
Arabic(Native), English(C1), French(B2), German(A1)

Certificates

- Cisco Networking Academy: Introduction to Cybersecurity [↗](#)
 - CCNA: Switching, Routing, and Wireless Essentials [↗](#)
 - Security Blue Team: Introduction to Network Analysis [↗](#)
- CCNA: Introduction to Networks [↗](#)
 - Security Blue Team: Introduction to Digital Forensics [↗](#)

Organisations

09/2023 – 09/2024 Sfax, Tunisia	Google Developer Student Club ENETCOM , Cybersecurity Instructor & Department Lead ↗ Spearheaded hands-on workshops and student projects, driving engagement and skill-building in cybersecurity through impactful initiatives.
09/2022 – 09/2024 Sfax, Tunisia	4C Career Center & Skills Certification ENETCOM , Member Actively contributed to business idea competitions and was selected to represent ENETCOM at an international process optimization event organized collaboratively by KNUST (Ghana), ENETCOM (Tunisia), and Leipzig University (Germany).
